Components

Micron memory and storage solutions define what the world can do with data. With 37,000 members, in 18 different countries, works with countless customers to innovate every day and pursue the products that will shape how we live and work tomorrow.

Move beyond processing power by choosing the right memory and storage technologies to give you more control over the essential systems that affect your business. Micron helps you scale, simplify, consolidate and automate to get the maximum value out of your data center.

The Memory And Storage Experts™

Components | Gaming

As a brand of Micron, one of the largest memory manufacturers in the world, Crucial brings you the quality and expertise that's been built into new computers for 40-plus years. You'll notice the difference.

Every Crucial memory module and SSD must pass hundreds of quality inspections and undergo additional reliability testing before leaving the doors.

Memory runs the app you use all day, every day, and SSDs store your digital life. Reliability is important.

Components | Personal Storage

For more than 20 years, Lexar has been trusted as a leading global brand of memory solutions – so we know first-hand just how quickly data is transforming our world. Our award-winning lineup performs second-to-none and includes memory cards, USB flash drives, readers, and solid-state drives for retail and OEM customers. Whether shooting photos, capturing video, or simply transferring and sharing files on the go, Lexar memory solutions provide the performance and reliability needed to get the most from your digital device.
